

Technical information

VEGETABLE COMPOST ST-HENRI (0.30-0.15-0.20)

PRODUCT : 212002

BATCH : 2020

PURPOSE :

- To enrich and improve the structure of all types of soils whether sandy, loamy or clay soils.

BENEFITS :

- Increases the organic matter;
- Increases the soil water-retention capacity;
- Supplies the nutrients essential for growth of plants and development of soil micro-organisms;
- Compost is made of recycled green residues.

COMPOSITION :

- Compost (leave, grass, food scraps and ligneous matters), sphagnum peat moss.

*Note : This compost may contain small pieces of plastic from bags used for picking up green waste, is not recommended for topdressing.

GUARANTEED MINIMUM ANALYSIS (WET BASE) :

- **Total nitrogen (N)** **0.30 %**
0,25 % water-insoluble nitrogen
- **Available phosphoric acid (P₂O₅)** **0.15 %**
0,20 % total phosphoric acid
- **Soluble potash (K₂O)** **0.20 %**
- **Organic matter** **15 %**
- **Maximum moisture content** **65 %**

OTHER PHYSICOCHEMICAL CHARACTERISTICS :

- **pH** **6.5 – 8.0**
- **C/N ratio** **15 - 25**

DIRECTIONS FOR USE :

- Perennials, trees and shrubs fertilization :

In spring, apply 2.5 cm (1 in) of vegetable compost on the soil and incorporate to a depth of 15 cm (6 in) if possible. Repeat every 2 years.

- Planting annuals, perennials, trees and shrubs :

When planting, mix 1 part of vegetable compost with 4 parts of soil.

- Lawn implantation :

Before planting a new lawn, spread 2.5 cm (1 in) of vegetable compost on the ground and embed in a depth of 15 cm (6 in).

- Agricultural use :

Apply to the soil at a maximum rate of 89 tons/ha per year.

- Notice :

The application rate shall be in accordance with provincial or territorial regulations related to fertilizer element or trace element applications to soil, as well as the fertilizers act and fertilizers regulations.

BULK PRODUCT :

- The estimate weight of the product appears on the bill of lading supplied by the carrier at the time of delivery.
